

Mumetal Magnetic Shielding mesh

For the outstanding EMI and RFI Shielding, Mu Metal magnetic shielding mesh has offered proven performance in the industry.

Outstanding quality and flame resistant Mu Metal mesh is best fit for radiofrequency and microwave shielding applications. It is widely used in low intensity fields that demand extremely high attenuation and largest initial permeability and exhaustive shielding performance. Mumetal mesh is fully annealed and is produced in several stock gauges. It doesn't need re-annealing and are ready for immediate use.

Applications

1. Industrial and commercial electric devices screening
2. Sensitive electric and electronic systems screening
3. Electrical components and circuits shielding
4. Home appliances
5. Power sources, conductors and transmission

Industrial Areas demanding Mumetal magnetic shielding mesh:

- Aerospace
- Military and defense sectors
- Transportation
- High Technology sectors
- Communication industry
- OEM design
- R & D laboratory
- Science and Medical
- Robotics
- Drones
- Wind Turbines
- Desktop computers
- Academic institutions
