

## Nickel Wire Mesh For Electrode

Nickel Wire Mesh an outstanding corrosion resistant material shows its suitability for use as battery electrode or anode/cathode in the electro-chemical reactions. It offers good electric conductivity.

### Applications

1. Fuel cells
2. Electro-chemical cells, welding
3. Battery Electrodes
4. Current collector

At Heanjia Super-Metals, Wire Mesh weaving experience and talent are combined to produce the cloth products. We are a specialized weaver and fabricator of industrial wire mesh since 1984. The weaving processes are conducted in-house at Beijing, China. We are the complete source for Nickel wire mesh products for electrode applications.

The fine grid nickel mesh is produced in the different mesh sizes by using the excellent quality and highly pure Nickel wires.

All of the nickel mesh products can be easily cut with the standard scissors for the final use. Contact us to get more information about our nickel wire mesh solutions. Our customer care department takes pleasure in supporting you in finding the most suitable mesh form to meet your needs.
