

Silver Mesh for Magnetic Shielding

Fine Silver Shielding Mesh Outperforms than what you need

Are you looking for a mesh that provides good conductivity and shielding performance?
Choose Silver with Nylon mesh.

Frequency – 10MHz to 40 GHz

Surface conductivity – >0.5 ohm per square

Characteristics

- Outstanding material for extreme grounding, static discharge, electric field shielding and radiofrequency shields.
- Skin friendly so it can be used in clothing or bedding
- Excellent microwave and radiowave shielding
- Silver mesh was initially developed for its anti-bacterial properties. Later its excellence in shielding was also recognized that make it an ideal material for electric and magnetic shielding applications.
- Pure silver is coated on Nylon for high strength
- Lightweight
- Anti-static surface

Applications

- Electric field shielding
- Microwave shielding
- Radiofrequency shielding outfits
- Faraday cage
- Window drapes and appliance enclosure
