Sintered Fiber Felt offers a durable structure with good permeability and precise filtration rating. Endless cleanability. Additionally, the fiber felt is also resistant to corrosion, elevated temperature and high pressure conditions.

**Construction materials:** Nickel, Monel, Inconel grades, Incoloy grades, Hastelloy grades, Stainless steel grades.

**Filtration rating:** 1 - 250 microns

### Sintered Fiber Felt Applications

1. Pharmaceuticals
2. Fluidized beds
3. Liquid & gas filter
4. Chemical treatment
5. Chemical fiber filtration
6. Food and drinks
7. Oil-gas filtration
8. Polymer production
9. Pharmaceuticals
10. Hydraulics Filter
11. Textile
12. Packaging film
13. Demisting
14. Coalescing
15. Gas filtration
16. Filtration of cutting fluids
17. Water treatment units
