

Heanjia Super-Metals Co., Ltd

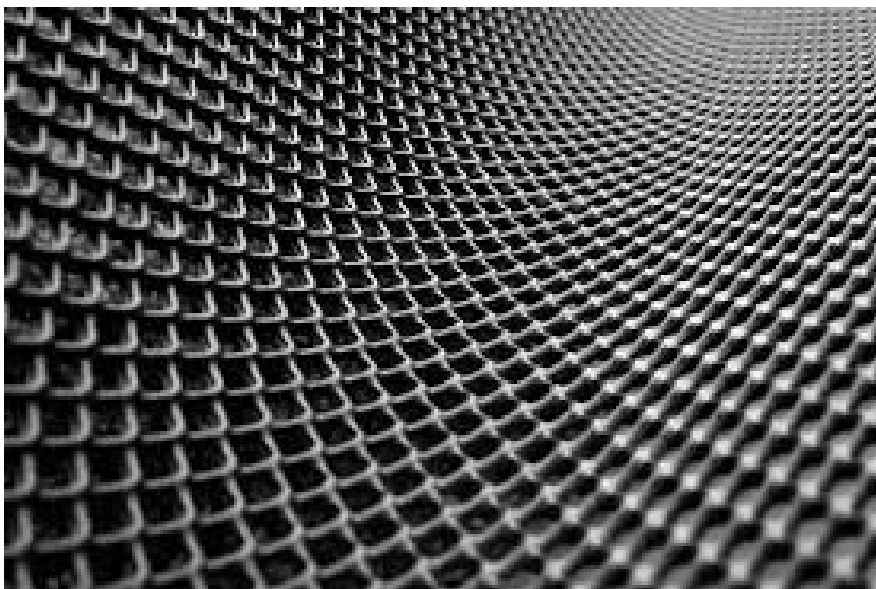

Titanium Mesh

Titanium Woven Mesh

Titanium Perforated Metal

Titanium Expanded Metal Sheet

Titanium mesh cloth is significant for its corrosion resistance, lightweight and high strength characteristics. It is utilized in the wide range of industries such as aerospace, medical and electroplating and more. Heanjia Super-Metals uses above 99% of pure titanium to produce the excellent quality mesh products. The protective oxide layer on titanium prevents its

reaction with other materials hence it offers longer than expected performance. We use only pure titanium metal in the production of our screening solutions that guarantee the outstanding performance at the end use.

Titanium Mesh Applications

Skull and dental implantation	Anodes	Catalyst screens	Piping ad smoke screens
-------------------------------	--------	------------------	-------------------------

Titanium Mesh Specifications

Mesh	Wire Diameter	Opening / Open Area	Roll Width
